

UNIVERSITÄT
BAYREUTH

**Module Handbook
for the
International Master's Programme
Biofabrication
at the University of Bayreuth
(version date: 5 July 2016)**

Great care has been taken in the preparation of this module handbook. Due to the extent of the material however, errors cannot be ruled out completely. Therefore, no guarantee is given for the correctness of the information. The official examination and study regulations, in their current version, are binding.

Preliminary remarks

The Faculty of Engineering Science at the University of Bayreuth has produced a module handbook which describes the modules that make up the international master's programme *Biofabrication*.

Herein are listed: Content and the qualification objective, prerequisites, possible uses in the course, the frequency at which the module is offered, the period of time within which the module can be completed, the courses that make up the module as well as the credits to be acquired as a measure of the workload and a description of the type of assessment components required for the award of credits.

Abbreviations:

CP: Credit Points	SWS: Weekly hours per semester
P: Practical course/Internship	nP: Practical training of n weekly hours per
S: Seminar	nS: Seminar of n weekly hours per semester
T: Tutorial	nT: Tutorial with n weekly hours per semester
V: Lecture	nV: Lecture of n weekly hours per semester

Outline of the study programme

The international master's programme *Biofabrication* has a modular structure. The study programme consists of the following sections:

1. General Part
 - a) Material and Natural Sciences
 - b) Engineering Science
 - c) Transferable Skills
2. Specialization
3. Master's Thesis

Contents

Compulsary Modules

AM	Advanced Module	4
BF	Biofabrication	5
BMA	Biomaterials	6
CAE	Computer Aided Engineering.....	7
FTE	Fundamentals of Tissue Engineering and Quality Management	8
IAM	International Advanced Module	9
KES	Engineering Science competence enhancement core elective module area	10
KMNS	Material and Natural Science competence enhancement core elective module area.....	11
MMT	Management Training and Entrepreneurship	12
MT	Master's Thesis.....	13
PPM	Processing of Polymeric Materials.....	14
SA	Summer Academy	15
SAB	Self-Assembling Biopolymers	16
SF	Scientific Working	17

Core elective modules

WAP	Advanced Polymers.....	18
WBI	Biotechnology	19
WBT	Bioengineering for Tissue Regeneration	20
WCM	Carrier Materials and Devices	21
WCT	Coating Technology and Interface Engineering.....	22
WLA	Automation Lab Course	23
WPM	Polymer Materials	24
ESC	Physical Chemistry of Supramolecular Assemblies.....	25
WSC	Supramolecular Chemistry	26

Module AM

1	Module name:	Advanced module																											
2	Subject area / Responsible for the module:	Subject-related skills Participating chairs/prof. in the study programme (University of Bayreuth, and national partner universities / institutions according to the list)																											
3	Content and qualification objective: a) Content: b) Qualification objective:	The educational content relates to the current research projects of the respective chosen research group. The module includes experimental work, literature work, participation in the working group seminars with presentation and preparation of a report. The students will gain an insight into the research practice of various groups involved. In addition, they will acquire experimental skills through laboratory work under supervision, and teamwork will be practiced and presentation techniques trained.																											
4	Prerequisites:	The successful completion of the general subject-related modules is recommended.																											
5	Possible inclusion in curriculum:	In the third or fourth semester																											
6	Frequency:	at any time																											
7	Duration of the module:	1 semester																											
8	Overview and credits:	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 5%;">No.</th> <th style="width: 10%;">Abbr.</th> <th style="width: 55%;">Organiser</th> <th style="width: 10%;">SWS</th> <th style="width: 10%;">CP</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">AM1</td> <td>(Participating chairs/profs in the degree programme)</td> <td style="text-align: center;">x</td> <td style="text-align: center;">8</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">AM2</td> <td>(Participating chairs/profs in the degree programme)</td> <td style="text-align: center;">x</td> <td style="text-align: center;">8</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">AM3</td> <td>(Participating chairs/profs in the degree programme)</td> <td style="text-align: center;">x</td> <td style="text-align: center;">8</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td style="text-align: center;">x</td> <td style="text-align: center;">24</td> </tr> </tbody> </table>			No.	Abbr. 2	AM2	(Participating chairs/profs in the degree programme)	x	8																									
3	AM3	(Participating chairs/profs in the degree programme)	x	8																									
Total			x	24																									
9	Module examination:	Portfolio examination: an oral presentation (30 min, weighting 0.3) and a written report (weighting 0.7) per sub-module																											
10	Student workload:	Module AM1 240 h, AM2 240 h, AM3 240 h Module AM total: 720 hours																											

Module BF

1	Module name:	Biofabrication																	
2	Subject area / Responsible for the module:	Materials Science Chair of Biomaterials, N.N.																	
3	Content and qualification objective:	<p>a) Content: Definitions: Scaffolding / support materials, matrices, generative manufacturing processes; Bio-printing / cell printing, Biofabrication; Medical / ATMP / regulatory basis; Introduction to anatomical basic knowledge; Materials / polymers for Biofabrication; Introduction to rheology; Melting stratification, creation of G-codes and STL files; constructing objects with Solid Works software; Dispenser printing; Inorganic powder printing, stereolithography and two-photon polymerization; Melt Electrospinning writing; Applications of Biofabrication</p> <p>b) Qualification objective: Basic understanding of the various objectives of Biofabrication and knowledge as well as ability to assess restrictions of production; Design and manufacture of 3D objects by using appropriate software and digital signals based on anatomical- and print-dependant resolution. Understanding of the different possibilities of 3D printing, as well as mechanical and technical process details.</p>																	
4	Prerequisites:	<p>a) general: advanced study skills</p> <p>b) university courses: General Process Engineering; Composition and Properties of Polymers</p>																	
5	Possible inclusion in curriculum:	in the first or second semester																	
6	Frequency:	yearly																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%;">No.</th> <th style="width: 10%;">Abbr.</th> <th style="width: 50%;">course</th> <th style="width: 15%;">SWS</th> <th style="width: 15%;">CP</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">BF</td> <td>Biofabrication</td> <td style="text-align: center;">2L + 2T</td> <td style="text-align: center;">5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td style="text-align: center;">4</td> <td style="text-align: center;">5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	BF	Biofabrication	2L + 2T	5	Total			4	5
No.	Abbr.	course	SWS	CP															
1	BF	Biofabrication	2L + 2T	5															
Total			4	5															
9	Module examination:	A written examination (60 minutes, weighting 100%)																	
10	Student workload:	<p>Weekly 2 h lecture plus 1 h preparation/follow-up work = 45 h; Weekly 2 h practice plus 2 h preparation/follow-up work = 60 h; Exemamination preparation = 45 h</p> <p style="text-align: right;">Module BF total: 150 hours</p>																	

Module BMA

1	Module name:	Biomaterials																	
2	Subject area / Responsible for the module:	Materials Science Chair of Biomaterials																	
3	Content and qualification objective: a) Content:	Materials science across different material classes, natural macromolecules, biopolymers and composite materials, hybrid materials; Biomaterials, biomineralization, deepening of biochemical / biophysical analytical methods; Design principles of nature as a template for biomimetic technical applications; Applications in nanotechnology, pharmacology/medical technology, material science and industry.																	
	b) Qualification objective:	Consolidation of knowledge of materials science across material classes, natural macromolecules and biopolymers and their assembly; acquisition of a comprehensive overview of structural and biophysical analysis of natural macromolecules; acquisition of systematic methodological skills for analysing and processing, as well as communication of interdisciplinary scientific aspects in theory and practice; acquisition of decision-making competence regarding possible technical applications.																	
4	Prerequisites:	a) general: advanced study skills b) university courses: Biochemistry for Engineers; Biology for Engineers																	
5	Possible inclusion in curriculum:	in the first or second semester																	
6	Frequency:	yearly																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>BMA</td> <td>Biomaterials</td> <td>2L + 2T</td> <td>5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>4</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	BMA	Biomaterials	2L + 2T	5	Total			4	5

Total			4	5															
9	Module examination:	A written examination (60 minutes, weighting 100%)																	
10	Student workload:	Weekly 2 h lecture plus 1 h preparation/follow-up work = 45 h; Weekly 2 hours tutorials plus 2 h preparation/follow-up work = 60 h; Examination preparation = 45 h Module BMA total: 150 hours																	

Module CAE

1	Module name:	Computer Aided Engineering																						
2	Subject area / Responsible for the module:	Engineering Science Chair of Design and CAD																						
3	Content and qualification objective:	<p>a) Content: CAE1: mastery of modern calculation methods and their application to constructive tasks; knowledge of associated software. Ability to design independently using CAD. CAE2: theory and application of finite element method to static problems with a focus on the constructive point of view and modelling.</p> <p>b) Qualification objective: CAE1: ability to create CAD models and generate design proposals using optimization algorithms. CAE2: mastery of modern methods of calculation of statics and their application to constructive tasks; knowledge of associated software</p>																						
4	Prerequisites: beneficial.	Basic technical understanding; further knowledge of numerics is																						
5	Possible inclusion in curriculum:	in the first or second semester																						
6	Frequency:	yearly																						
7	Duration of the module:	2 semesters																						
8	Overview and credits:	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 5%;">No.</th> <th style="width: 10%;">Abbr.</th> <th style="width: 60%;">course</th> <th style="width: 10%;">SWS</th> <th style="width: 15%;">CP</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">CAE1</td> <td>Optimization</td> <td style="text-align: center;">2L</td> <td style="text-align: center;">3</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">CAE2</td> <td>FE Seminar</td> <td style="text-align: center;">2S</td> <td style="text-align: center;">2</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td style="text-align: center;">4</td> <td style="text-align: center;">5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	CAE1	Optimization	2L	3	2	CAE2	FE Seminar	2S	2	Total			4	5

Total			4	5																				
9	Module examination:	Portfolio examination: a written examination (duration 90 minutes, weighting 60%) and a written composition (weighting 40%)																						
10	Student workload:	Weekly 2 h lecture plus 2 h preparation/follow-up work = 60 h; Weekly 2 h seminars plus 2 h preparation/follow-up work = 60 h; Examination preparation = 30 h. Module CAE total: 150 hours																						

Module FTE

1	Module name:	Fundamentals of Tissue Engineering and Quality Management				
2	Subject area / Responsible for the module:	Bioprocess technology Chair of Process Biotechnology				
3	Content and qualification objective:					
	a) Content:	Tissue engineering of complex constructs: supply, hypoxia, nutrient diffusion, extracellular matrix, supply with nerves and blood vessels. Performance of risk analysis in accordance with ISO 17025:2005, Biological evaluation of medical devices according to DIN EN ISO 10993.				
	b) Qualification objective:	The students will have knowledge of tissue engineering and quality management.				
4	Prerequisites:	general: advanced study skills				
5	Possible inclusion in curriculum:	in the first or second semester				
6	Frequency:	yearly				
7	Duration of the module:	1 semester				
8	Overview and credits:					
		No.	Abbr.	course	SWS	CP
		1	FTE1	Fundamentals of Tissue Engineering	2L + 1P	3
		2	FTE2	Quality Management	1L	2
		Total			4	5
9	Module examination:	A written examination (60 minutes, weighting 100%)				
10	Student workload:	Weekly 3 h lecture plus 1 h preparation/follow-up work = 90 h; Weekly 1 h practical plus 1 h preparation/follow-up work = 30 h; Examination preparation = 30 h Module FTE total: 150 hours				

Module IAM

1	Module name:	International Advanced Module																	
2	Subject area / Responsible for the module:	Subject-related skills Participating groups of international partner universities / institutions according to the list																	
3	Content and qualification objective:	<p>a) Content: The educational content relates to the current research projects of the respective chosen research group. The module includes experimental work, literature work, participation in the working group seminars with presentation and preparation of a report.</p> <p>b) Qualification objective: The students will gain an insight into the research practice of various groups involved. In addition, they will acquire experimental skills through laboratory work under supervision; teamwork will be practiced and presentation techniques trained.</p>																	
4	Prerequisites:	The successful completion of the general professional module is recommended.																	
5	Possible inclusion in curriculum:	In the third or fourth semester																	
6	Frequency:	at any time																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>Organiser</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>IAM</td> <td>(Participating international partners see list)</td> <td>x</td> <td>24</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>x</td> <td>24</td> </tr> </tbody> </table>			No.	Abbr. 10	Student workload:	according to the modules selected (see Management Training selection catalogue), Module MMT total: 180 hours																											

Module MT

1	Module name:	Master's Thesis				
2	Subject area / Responsible for the module:	Participating chairs in the programme of study				
3	Content and qualification objective:					
	a) Content:	Written thesis on a current engineering topic which is provided by a professor or <i>Privatdozent</i> of the participating faculties of the University of Bayreuth.				
	b) Qualification objective:	Ability to independently process a research-related engineering problem; practice written and oral presentation and communication skills.				
4	Prerequisites:	a) general: advanced study skills b) evidence of examination totalling at least 55 CP				
5	Possible inclusion in curriculum:	In the third or fourth semester				
6	Frequency:	yearly				
7	Duration of the module:	1 semester (completed within 6 months)				
8	Overview and credits:					
		No.	Abbr.	course	SWS	CP
		1	MT	Master's Thesis	-	30
		Total				30
9	Module examination:	Graded written thesis (weighting 0.75) and graded oral presentation (30 min., weighting 0.25).				
10	Student workload:	Module MT total: 900 hours				

Module PPM

1	Module name:	Processing of Polymeric Materials																						
2	Subject area / Responsible for the module:	Materials Science Professorship of Biopolymer Processing																						
3	Content and qualification objective:	<p>a) Content: Processing methods of natural and synthetic polymers from the aspects of materials and engineering science, introduction to the theoretical basis for describing the deformation and flow behaviour of polymeric materials: fluid mechanics, elasticity theory and plasticity theory; flow properties of liquids (melts, solutions) and their significance in polymer processing; deformation and fracture mechanics of polymers taking into account structural features; analytical methods for measuring rheological properties; implementation of competencies acquired through experimental laboratory work.</p> <p>b) Qualification objective: Acquisition of competence in the field of characterization and processing of polymeric fluids (melts, solutions); influence of processing methods on the solid mechanics of polymeric materials; Decision-making competence in the choice and application of analytical methods for the characterization of polymeric liquids and solids, as well in the interpretation of the measurement data .</p>																						
4	Prerequisites:	<p>a) general: advanced study skills</p> <p>b) university courses: general process engineering, construction and properties of polymers</p>																						
5	Possible inclusion in curriculum:	in the first or second semester																						
6	Frequency:	yearly																						
7	Duration of the module:	1 semester																						
8	Overview and credits:	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">No.</th> <th style="text-align: center;">Abbr.</th> <th style="text-align: left;">course</th> <th style="text-align: center;">SWS</th> <th style="text-align: center;">CP</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">PPM1</td> <td>Aspects in Processing of Polymeric Materials</td> <td style="text-align: center;">2L + 1T</td> <td style="text-align: center;">4</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">PPM2</td> <td>Processing of Polymeric Materials Practical Course</td> <td style="text-align: center;">1P</td> <td style="text-align: center;">1</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td></td> <td style="text-align: center;">5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	PPM1	Aspects in Processing of Polymeric Materials	2L + 1T	4	2	PPM2	Processing of Polymeric Materials Practical Course	1P	1	Total				5

9	Module examination:	A written examination (60 min, weighting 100%)																						
10	Student workload:	<p>Weekly 2 h lecture plus 1 h preparation/follow-up work = 45 h; Weekly 1 h practice plus 1 h preparation/follow-up work = 30 h; Weekly 1 h practical training plus 1 h preparation/follow-up work = 30 h; Examination preparation = 45 h</p> <p style="text-align: center;">Module FTE total: 150 hours</p>																						

Module SA

1	Module name:	Summer Academy																	
2	Subject area / Responsible for the module:	Materials Science / Natural Sciences / Engineering Science Chair of Biomaterials																	
3	Content and qualification objective:	<p>a) Content: The course content involves the latest methods and concepts in biofabrication research (fundamental scientific questions, terminology, methods and laboratory equipment). Lectures will be given by lecturers from Germany and abroad and instructors of the Biofabrication programme. Thus, the students receive a thorough overview of different research focuses (incl. international partners) and get to know the excellent instrumental equipment at UBT and its infrastructure.</p> <p>b) Qualification objective: The students will gain an insight into biofabrication in general and the research practice of various groups involved in particular.</p>																	
4	Prerequisites:	advanced study skills																	
5	Possible inclusion in curriculum:	between the first and second or second and third semesters																	
6	Frequency:	winter semester																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%;">No.</th> <th style="width: 10%;">Abbr.</th> <th style="width: 50%;">Organiser</th> <th style="width: 10%;">SWS</th> <th style="width: 10%;">CP</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">SA</td> <td style="text-align: center;">Summer Academy</td> <td style="text-align: center;">x</td> <td style="text-align: center;">5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td style="text-align: center;">x</td> <td style="text-align: center;">5</td> </tr> </tbody> </table>			No.	Abbr. 1	SAB	Self-Assembling Biopolymers	2L + 2T	5																
Total			4	5																
9	Module examination:	A written examination (60 minutes, weighting 100%)																		
10	Student workload:	Weekly 2 h lecture plus 1 h preparation/follow-up work = 45 hours; Weekly 2 h tutorials plus 2 h preparation/follow-up work = 60 h; Examination preparation = 45 h Module SAB total: 150 hours																		

Module SF

1	Module name:	Scientific Working																											
2	Subject area / Responsible for the module:	Developing transferable skills Chair of Biomaterials																											
3	Content and qualification objective:	<p>a) Content: Introduction to the basics of scientific work; Design of experiments as well as data documentation and data quality control; Conveying the rules of good scientific practice. Introduction to the handling of scientific literature; Search, review, and critical examination of publications; Conveying the rules for good publishing. Presentation and discussion of case studies in small groups.</p> <p>b) Qualification objective: Knowledge of the rules of good scientific practice; systematic competence in the appraising scientific misconduct; Scientific discussion skills.</p>																											
4	Prerequisites:	advanced study skills																											
5	Possible inclusion in curriculum:	in the first or second semester																											
6	Frequency:	yearly																											
7	Duration of the module:	2 semesters																											
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>SF1</td> <td>Ethics in Science</td> <td>1L</td> <td>1</td> </tr> <tr> <td>2</td> <td>SF2</td> <td>Reception of Scientific Literature</td> <td>1T</td> <td>1</td> </tr> <tr> <td>3</td> <td>SF3</td> <td>How to write a paper</td> <td>3T</td> <td>3</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>5</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	SF1	Ethics in Science	1L	1	2	SF2	Reception of Scientific Literature	1T	1	3	SF3	How to write a paper	3T	3	Total			5	5

2	SF2	Reception of Scientific Literature	1T	1																									
3	SF3	How to write a paper	3T	3																									
Total			5	5																									
9	Module examination:	An oral examination (30min, weighting 100%). SF2 and SF3 are compulsory.																											
10	Student workload:	Weekly 1 h lecture plus 1 h preparation/follow-up work = 30 h; Weekly 4 h tutorial plus 1 h preparation/follow-up work = 75 h; Examination preparation = 45 h SF module total: 150 hours																											

WAP module

1	Module name:	Advanced Polymers core elective module																	
2	Subject area / Responsible for the module:	Polymer Science Chair of Macromolecular Chemistry II																	
3	Content and qualification objective:	<p>a) Content: Basic, as well as advanced knowledge about contemporary issues of polymer synthesis, modification and characterization.</p> <p>b) Qualification objective: Advanced knowledge of the synthesis, modification and characterization of polymers.</p>																	
4	Prerequisites:	general: advanced study skills																	
5	Possible inclusion in curriculum:	in the first or second semester																	
6	Frequency:	yearly																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>WAP</td> <td>Advanced Polymers</td> <td>2L + 2P</td> <td>5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>4</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	WAP	Advanced Polymers	2L + 2P	5	Total			4	5

1	WAP	Advanced Polymers	2L + 2P	5															
Total			4	5															
9	Module examination:	A written examination (60 minutes, weighting 100%)																	
10	Student workload:	<p>Weekly 2 h lecture plus 1 h preparation/follow-up work = 45 h; Weekly 2 h practical training plus 2 h preparation/follow-up work = 60 h; Examination preparation = 45 h</p> <p>WAP module total: 150 hours</p>																	

WBI module

1	Module name:	Biotechnology core elective module																						
2	Subject area / Responsible for the module:	Bioprocess engineering Chair of Process Biotechnology																						
3	Content and qualification objective: a) Content: b) Qualification objective:	Production organisms, gene technology, genetic engineering, metabolism engineering, synthetic biology, recombinant protein production, Bioprocess design, DoE, catalysis, downstream processes, GMP, process analysis technology (PAT), process validation, quality control, renewable resources Ability to develop basic processes for producing products for medical applications; ability to integrate renewable, natural raw materials in the material flows of the pharmaceutical industry.																						
4	Prerequisites:	a) general: advanced study skills b) university courses: Biology, Biochemistry, Chemistry (bachelor's level); Mathematics: differential and integral calculus, elementary algebra and polynomial functions, descriptive statistics																						
5	Possible inclusion in curriculum:	in the first or second semester																						
6	Frequency:	yearly																						
7	Duration of the module:	1 semester																						
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>WBI1</td> <td>Biotechnology</td> <td>2L</td> <td>3</td> </tr> <tr> <td>2</td> <td>WBI2</td> <td>Biotechnology Practical Course</td> <td>2P</td> <td>2</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>4</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	WBI1	Biotechnology	2L	3	2	WBI2	Biotechnology Practical Course	2P	2	Total			4	5

1	WBI1	Biotechnology	2L	3																				
2	WBI2	Biotechnology Practical Course	2P	2																				
Total			4	5																				
9	Module examination:	A written examination (60 min); WBI2 is compulsory																						
10	Student workload:	Weekly 2 h lectures plus 2 h preparation/follow-up work = 60 h; Weekly 2 h practical training plus 2 h preparation/follow-up work = 60 h; Examination preparation = 30 h WBI module total: 150 hours																						

WBT module

1	Module name:	Bioengineering for Tissue Regeneration core elective module																	
2	Subject area / Responsible for the module:	Materials Science / Engineering Science Chair of Biomaterials																	
3	Content and qualification objective:	<p>a) Content: Overview of molecular bioengineering, computer modelling of biological and physiological systems, genomics, proteomics and bioinformatics. Insight into biomedical engineering, molecular bioengineering, nerve and cardiac bioengineering, medical imaging, prosthetics, biomechanics; understanding of the cell at the molecular level; applications in various fields of medicine and diagnostics, tissue regeneration and organ replacement.</p> <p>b) Qualification objective: Overview of bioengineering techniques; comprehensive knowledge of regenerative medicine, healing technique, computer biology and bioinformatics; competencies in chemical and molecular bioengineering techniques, processing technology, imaging techniques, analytics, cell biology and biomedical applications. Acquisition of systematic methodological competencies for analysing, processing and communication of interdisciplinary science aspects in theory and practice; acquisition of decision-making competence regarding possible technical applications.</p>																	
4	Prerequisites:	<p>a) general: advanced study skills</p> <p>b) university courses: Biology, Biochemistry, Physics (bachelor's level)</p>																	
5	Possible inclusion in curriculum:	in the first or second semester																	
6	Frequency:	yearly																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 5%;">No.</th> <th style="width: 10%;">Abbr.</th> <th style="width: 60%;">course</th> <th style="width: 10%;">SWS</th> <th style="width: 15%;">CP</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">WBT</td> <td>Bioengineering for Tissue Regeneration</td> <td style="text-align: center;">2L + 2T</td> <td style="text-align: center;">5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td style="text-align: center;">4</td> <td style="text-align: center;">5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	WBT	Bioengineering for Tissue Regeneration	2L + 2T	5	Total			4	5

1	WBT	Bioengineering for Tissue Regeneration	2L + 2T	5															
Total			4	5															
9	Module examination:	A written examination. (60min, weighting 100%)																	
10	Student workload:	<p>Weekly 2 h lecture plus 2 h preparation/follow-up work = 60 h; Weekly 2 h practice plus 2 h preparation/follow-up work = 60 h; Examination preparation = 30 h</p> <p>WBT module total: 150 hours</p>																	

WCM module

1	Module name:	Drug Chemistry core elective module																	
2	Subject area / Responsible for the module:	Biomaterials Chair of Organic Chemistry I																	
3	Content and qualification objective:	<p>a) Content: Strategies of drug discovery (lead structure or diversity-oriented), pharmacophore detection, structure-effect relationships, methods of rational design of drugs, as well as structures and mechanisms of selected representatives of clinically important areas (e.g. cytostatics, anti-infectives).</p> <p>b) Qualification objective: Knowledge of basic properties of active substances, their rational optimization and the mechanisms of their effect.</p>																	
4	Prerequisites:	general: advanced study skills																	
5	Possible inclusion in curriculum:	in the first or second semester																	
6	Frequency:	yearly																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>WCM</td> <td>Drug Chemistry</td> <td>2L + 2P</td> <td>5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>4</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	WCM	Drug Chemistry	2L + 2P	5	Total			4	5
No.	Abbr.	course	SWS	CP															
1	WCM	Drug Chemistry	2L + 2P	5															
Total			4	5															
9	Module examination:	A written examination (60 minutes, weighting 100%)																	
10	Student workload:	<p>Weekly 2 h lecture plus 1 h preparation/follow-up work = 45 h; Weekly 2 h practical plus 2 h preparation/follow-up work = 60 h; Examination preparation = 45 h</p> <p>WCM module total: 150 hours</p>																	

WCT module

1	Module name:	WCT Coating Technology and Interface Engineering core elective module																						
2	Subject area / Responsible for the module:	Materials Science Chair of Materials Processing																						
3	Content and qualification objective:	<p>a) Content: Property modification of materials; Standardization system of production processes; Scientific methods for the qualification of existing and development of new processes; Functionalization, performance enhancements and lifetime increase of materials by coating; Targeted use of characteristic material properties during processing; Energy efficiency and process chain shortening in material processing, near-net-shape and generative manufacturing.</p> <p>b) Qualification objective: Better understanding of the influence of processing methods of material properties; Use of process and materials science knowledge for issues in materials technology; Competence for application-specific selection of manufacturing processes for all material classes.</p>																						
4	Prerequisites:	general engineering and materials science knowledge																						
5	Possible inclusion in curriculum:	in the first or second semester																						
6	Frequency:	yearly																						
7	Duration of the module:	1 semester																						
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>WCT1</td> <td>Surface and Coating Technologies</td> <td>2L</td> <td>3</td> </tr> <tr> <td>2</td> <td>WCT2</td> <td>Surface and Coating Technologies Practical Course</td> <td>1P</td> <td>2</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>3</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	WCT1	Surface and Coating Technologies	2L	3	2	WCT2	Surface and Coating Technologies Practical Course	1P	2	Total			3	5
No.	Abbr.	course	SWS	CP																				
1	WCT1	Surface and Coating Technologies	2L	3																				
2	WCT2	Surface and Coating Technologies Practical Course	1P	2																				
Total			3	5																				
9	Module examination:	WCT1 written examination (60 minutes, weighting 100%); WCT2 is compulsory																						
10	Student workload:	<p>Weekly 2 h lecture plus 2 h preparation/follow-up work = 60 h; Weekly 1 h practical plus 2 h preparation/follow-up work = 45 h; Examination preparation = 45 h</p> <p>WCT module total: 150 hours</p>																						

WLA module

1	Module name:	Automation Lab Course core elective module																						
2	Subject area / Responsible for the module:	Engineering Science Chair of Measurement and Control Technology																						
3	Content and qualification objective:	<p>a) Content: Three laboratory experiments conducted in a group on measuring sections, as well as single and multi-variable controls for common control variables (temperature, pressure, level among others). Individual project work with a task from the field of measurement and control technology (examples: computer-based sensing and evaluation of measurement data from a test bench; Controlling an automatic test bench; Realization of temperature control; Programming a microcontroller for radio-based data transmission; ...).</p> <p>b) Qualification objective: Consolidation and broadening of knowledge in the field of measurement and control technology; practical experience in the design, operation and optimization of computerized measurement devices and control circuits; Practice in the use of industry-typical hardware and software for data acquisition, for processing and display of measurement data as well as for the parameterization of the controller; Ability to classify the requirements for interfaces and bus systems as well as for systematic incorporation of related tasks.</p>																						
4	Prerequisites:	<p>a) general: advanced study skills</p> <p>b) university courses: Basic knowledge of mathematics, electrical engineering, measurement and control technology, as taught in the bachelor's programme Engineering Science.</p>																						
5	Possible inclusion in curriculum:	in the first or second semester																						
6	Frequency:	yearly																						
7	Duration of the module:	1 semester																						
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>WLA1</td> <td>Automation Practical Course</td> <td>1</td> <td>1</td> </tr> <tr> <td>1</td> <td>WLA2</td> <td>Automation Study Project</td> <td>X</td> <td>4</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>X</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	WLA1	Automation Practical Course	1	1	1	WLA2	Automation Study Project	X	4	Total			X	5
No.	Abbr.	course	SWS	CP																				
1	WLA1	Automation Practical Course	1	1																				
1	WLA2	Automation Study Project	X	4																				
Total			X	5																				
9	Module examination:	A written report of the individual project work.																						
10	Student workload:	<p>Weekly 1 h practical with 1 h preparation/follow-up work = 30 h; Individual project work = 90 h; Report on individual project work = 30 h</p> <p>WLA module total: 150 hours</p>																						

WPM module

1	Module name:	Polymer materials core elective module																		
2	Subject area / Responsible for the module:	Materials Science / Polymer Chemistry Professorship of Biopolymer Processing																		
3	Content and qualification objective:	<p>a) Content: Polymer synthesis procedure; Structure of polymers and polymer compounds; Properties of polymers; Technologies for the production of polymer compounds and polymer components; Ways to test the properties of polymer compounds and polymer components.</p> <p>b) Qualification objective: Knowledge of the special properties of polymers and polymer compounds (including time- and temperature-dependent viscoelastic behaviour). Knowledge of the characteristics of the different important manufacturing technologies (polymer synthesis procedure, compounding technology, processing methods such as injection moulding) and the possibilities for influencing the properties of the materials and the products made from these materials. Knowledge of the calculation methods of the complex flow conditions in plastics machinery and tools.</p>																		
4	Prerequisites:	general: advanced study skills																		
5	Possible inclusion in curriculum:	in the first or second semester																		
6	Frequency:	yearly																		
7	Duration of the module:	1 semester																		
8	Overview and credits:	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">No.</th> <th style="text-align: center;">Abbr.</th> <th style="text-align: left;">course</th> <th style="text-align: center;">SWS</th> <th style="text-align: center;">CP</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">WPM</td> <td>Polymer Materials: Technology of Polymer Modification</td> <td style="text-align: center;">2L + 2P</td> <td style="text-align: center;">5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td style="text-align: center;">4</td> <td style="text-align: center;">5</td> </tr> </tbody> </table>				No.	Abbr.	course	SWS	CP	1	WPM	Polymer Materials: Technology of Polymer Modification	2L + 2P	5	Total			4	5

10	Student workload:	Weekly 2 h lecture plus 1 h preparation/follow-up work = 45 h; Weekly 2 h practical training plus 2 h preparation/follow-up work = 60 h; Examination preparation = 45 h WCT module total: 150 hours																		

WSA module

1	Module name:	Supramolecular Assemblies core elective module																	
2	Subject area / Responsible for the module:	Chemistry Chair of Macromolecular Chemistry I																	
3	Content and qualification objective:	<p>a) Content: Basic interactions between molecules: multipoles, polarizability, van der Waals forces, π π interactions, hydrogen bonding; Thermodynamic and kinetic aspects of supramolecular Chemistry, formation and physical chemical properties of aggregates; Energy transfer; Interactions at interfaces; Physical chemistry of complex supramolecular systems: material and life science aspects</p> <p>b) Qualification objective: Knowledge and application of the physical chemistry of supramolecular structures</p>																	
4	Prerequisites:	general: advanced study skills																	
5	Possible inclusion in curriculum:	in the first or second semester																	
6	Frequency:	yearly																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>WSA</td> <td>Physical Chemistry of Supramolecular Assemblies</td> <td>2L + 2P</td> <td>5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>4</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	WSA	Physical Chemistry of Supramolecular Assemblies	2L + 2P	5	Total			4	5
No.	Abbr.	course	SWS	CP															
1	WSA	Physical Chemistry of Supramolecular Assemblies	2L + 2P	5															
Total			4	5															
9	Module examination:	A written examination (60 minutes, weighting 100%)																	
10	Student workload:	<p>Weekly 2 h lecture plus 1 h preparation/follow-up work = 45 h; Weekly 2 h practical training plus 2 h preparation/follow-up work = 60 h; Examination preparation = 45 h</p> <p>WSA module total: 150 hours</p>																	

WSC module

1	Module name:	Supramolecular Chemistry core elective module																	
2	Subject area / Responsible for the module:	Chemistry Chair of Macromolecular Chemistry I																	
3	Content and qualification objective:	<p>a) Content: Intermolecular interactions, determination of complex stabilities, molecular recognition with selected receptors (crown ethers, cyclodextrins, H- bridge systems, etc.); Supramolecular polymers, self-assembly in solution and on surfaces, gels, coordination polymers and coordination networks, thermotropic and lyotropic liquid crystals, self-assembly in aqueous media (micelles, vesicles), artificial ion channels; Applications such as enzyme models (Bioorganic Chemistry), in organic synthesis (template effects, phase transfer catalysis), in the pharmaceutical and cosmetics industries, in sensor technology and for the production of functional nanostructures.</p> <p>b) Qualification objective: Basic knowledge of supramolecular chemistry</p>																	
4	Prerequisites:	general: advanced study skills																	
5	Possible inclusion in curriculum:	in the first or second semester																	
6	Frequency:	yearly																	
7	Duration of the module:	1 semester																	
8	Overview and credits:	<table border="1"> <thead> <tr> <th>No.</th> <th>Abbr.</th> <th>course</th> <th>SWS</th> <th>CP</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>WSC</td> <td>Basics of Supramolecular Chemistry</td> <td>2L + 2P</td> <td>5</td> </tr> <tr> <td colspan="3" style="text-align: right;">Total</td> <td>4</td> <td>5</td> </tr> </tbody> </table>			No.	Abbr.	course	SWS	CP	1	WSC	Basics of Supramolecular Chemistry	2L + 2P	5	Total			4	5
